SUBJECT INDEX

Acetic acid
Models for growth of *Z. bailii,* 222
Roles of ORP in EO water for microbial inactivation, 19
Acetic acid transport
Transport of acetic acid in *D. anomala,* 96
Acid
Effect of pH on *E. coli,* 12
Acid foods
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Acidified sodium chlorite
Acidified sodium chlorite treatment of broiler carcasses, 1087
Acid tolerance
Survival of *V. vulnificus,* 1049
Acid washes
Validation of acid washes as critical control points, 1676
Activity
Activity of myrosinase from broccoli, 400
Adherence
Enhanced adherence of persistent *L. monocytogenes* strains, 1204
Enzymatic quantification of *Bifidobacterium,* 322
Adhesion
Probiotics in removal of aflatoxin, 412
Visualization of *E. coli*–beef interaction, 427
Aerobic-enrichment
PCR detection of *C. jejuni,* 299
Aerobic plate count
Compactdry TC evaluation, 665
Aeromonas spp.
Aeromonas spp. in ready-to-eat foods, 1754
Aflatoxin(s)
Aflatoxin binding to bifidobacteria, 1133
Aflatoxin reduction by Korean soybean paste, 1295
Enzymatic degradation of aflatoxin, 415
In vivo binding of aflatoxin B_1 by selected bacterial strains, 549
Probiotics in removal of aflatoxin, 412
Aflatoxin B_1
Aflatoxin B_1 degradation and divalent cations, 102
Aflatoxin M_1
Removal of aflatoxin M_1 by lactic acid bacteria, 645
Agar
B. cereus growth on solid media, 926
Air
yadA-positive *Y. enterocolitica* in a pig slaughterhouse, 31
Airborne bacteria
Aerobiology of cattle abattoir, 1523
Aircraft
S. aureus carriage, PFGE types, and enterotoxicity, 1487
Air-permeable pouches
Competition of *L. monocytogenes* with normal flora, 1702
Albacore
Histamine and biogenic amine production by *M. morganii,* 244
Alfalfa
Biofilms on alfalfa sprouts, 625
Alfalfa seeds
Salmonella on alfalfa seeds, 1475
Alicyclobacillus
Heat resistance of *A. acidocaldarius,* 1377
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Alicyclobacillus acidoterrestris
Detection of guaiacol in apple juice, 1517
Survival and growth of *Alicyclobacillus,* 1117
Alkaline phosphatase
Detection of alkaline phosphatase activity in ewe's milk, 1258
2-Alkylcyclobutanones
Hydrocarbons and 2-alkylcyclobutanones in irradiated perilla seeds, 1563
Allergenicity
Possibility of inhibition of shrimp allergy by ionizing radiation, 940
Allyl isothiocyanate
Bactericidal activity of allyl isothiocyanate, 727
E. coli inactivated by combined processing treatments, 884
Almond
ELISA for almond proteins in food, 252
Alpinia galanga
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Amoxicillin
Simultaneous determination of penicillin residues by HPLC, 1421
Ampicillin
Simultaneous determination of penicillin residues by HPLC, 1421
AMRS
Spinal cord in AMRS product, 1107
Anisakis sp.
Anisakids in muscle of Argentinean hake, 1141
Antagonists
Biocontrol of *B. cinerea* on strawberry fruits, 386
Ante-mortem
Bacteria in pig intestines, 1253
Antibacterial activity
Antibacterial activity of a chitooligosaccharide, 747
Antibiotic(s)
Antibiotics and *Salmonella* Typhimurium in pigs, 709
Multiple *Campylobacter* subtypes from meat, 1654
Salmonella in molted laying hens, 545
Salmonella Typhimurium DT104 in poultry, 155
Antibiotic residue
Detection of tetracycline residues in milk, 953
Antibiotic resistance
Antibiotics and *Salmonella* Typhimurium in pigs, 709
Prevalence of *Salmonella* spp. in Korea, 655
Antibiotic susceptibility
Characterization of *V. parahaemolyticus* in Taiwan, 900
Conjugated bile salts and antibiotic susceptibility, 1369

Antigenic properties
Possibility of inhibition of shrimp allergy by ionizing radiation, 940
Antimicrobial
Acidified sodium chlorite treatment of broiler carcasses, 1087
Antimicrobial activity of a synthetic peptide, 889
Antimicrobial(s) of a pozol isolate, 1123
Susceptibility of *Y. enterocolitica* swine isolates, 395
Antimicrobial activity
Antimicrobial activity of rosemary, 1359
Combined antimicrobial effect of hop resins, 735
Antimicrobial resistance
Salmonella serotypes in beef cows, 1648
Vancomycin-resistant enterococci in raw meat, 912
Apple cider
E. coli O157:H7 in apple cider, 1026
UV inactivation of *E. coli,* 1587
UV reduction of *E. coli* O157:H7 in cider, 563
Apple fruits
Salmonella Chester on apple fruits, 876
Apple juice
Detection of guaiacol in apple juice, 1517
E. coli in apple juice, 1021
Patulin adsorption with carbon-composite adsorbents, 106
Apples
E. coli O157:H7 in the presence of plant pathogens on apples, 1637
E. coli removal from whole apples, 703
Survival and growth of *Alicyclobacillus,* 1117
Argentinean hake
Anisakids in muscle of Argentinean hake, 1141
Ascaris
Isolation of parasites from fruits and vegetables, 775
Aspergillus
Immunochemical detection of molds, 281
Aspergillus parasiticus
Aflatoxin reduction by Korean soybean paste, 1295
ATP
Microbial methods for detection of cleaning chemical residues, 210
Attached bacteria
Salmonella Chester on apple fruits, 876
Attachment
Bacterial attachment to lettuce leaves, 1433
E. coli O157:H7 association and penetration into beef tissue, 3
Attitudes
Food handlers and foodborne diseases, 381
Automated methods
Petrifilm Series 2000, 1137
Avoparacin
Vancomycin-resistant enterococci in raw meat, 912
a_w
B. cereus growth on solid media, 926

Bacillus
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Bacillus cereus
Antimicrobial activity of carvacrol on rice, 620
B. cereus growth on solid media, 926
Growth of *Bacillus cereus* in rice, 268
Multiplex PCR for *B. cereus,* 1496
Bacillus cereus F4431/73
pH effect on free chlorine species in EO water, 1534
Bacillus sp.
Antimicrobial(s) of a pozol isolate, 1123
Bacillus subtilis spores
Model for UV surface disinfection, 63
Bacteria
Beef carcass decontamination, 1080
Microbiological quality of pressure-treated sausages, 1093
Pathogens and toxin production associated with crawfish, 1687
Real-soil hand disinfection model, 495
Surface decontamination of orange fruit, 961
Bacterial detection
Evaluation of the two rapid *E. coli* O157 methods, 860
Bacterial flora
Reduction of poultry bacteria with oleic acid, 1282
Bacterial growth
Glucose and tagatose effects on bacterial growth, 71
Bacterial reduction
Grovac process, 1231
Bacterial spores
Heat resistance of *A. acidocaldarius,* 1377
Bactericidal
Bactericidal activity of isothiocyanate, 25
Bacteriocin(s)
Biopreservatives in meat products, 721
Kimchi bacteriocin, 1707
Bactometer
Conventional versus rapid methods for counting *E. coli,* 1179
Beef
Antimicrobial effect of herb extracts on beef, 601
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Beef carcass decontamination, 1080
Beef variety meat decontamination, 44
CPC treatments of beef, 593
E. coli O157:H7 association and penetration into beef tissue, 3
Evaluation of the two rapid *E. coli* O157 methods, 860
Helicobacter pylori in cattle and beef products, 174
Lactic acid and nisin effects on *Listeria monocytogenes* on beef, 131
Pathogen interventions on beef, 1326
Shiga toxin-producing *E. coli* on Prince Edward Island, 1583
Visualization of *E. coli*–beef interaction, 427
Beef carcasses
Indicator bacteria on beef carcasses, 51
Behavior
Food handlers and foodborne diseases, 381

Behavioral Risk Factor Surveillance Survey
Evaluation of safe food-handling labels, 1321
Benzoate
E. coli O157:H7 in apple cider, 1026
Beverages
Microbiological quality of ice, 78
Bifidobacteria
Aflatoxin binding to bifidobacteria, 1133
Conjugated bile salts and antibiotic susceptibility, 1369
Viability of bifidobacteria, 327
Bifidobacterium
Enzymatic quantification of *Bifidobacterium,* 322
Bigelow model
Thermal death of histamine-producing bacteria in seafood, 277
Bile
Conjugated bile salts and antibiotic susceptibility, 1369
V. vulnificus and its phage survival, 1667
Biocontrol
Biocontrol of *B. cinerea* on strawberry fruits, 386
Biofilms
Biofilms on alfalfa sprouts, 625
Biogenic amine(s)
Biogenic amine reduction in fermented sausages, 237
Biogenic amines in cheese, 1551
Biogenic amines in fermented sausages, 1544
Biogenic amines in table olives, 111
Control of biogenic amine production in fermented sausages, 1556
Histamine and biogenic amine production by *M. morganii,* 244
Bioluminescence
Microbial methods for detection of cleaning chemical residues, 210
Biopreservation
Lacticin 3147 in pork sausage, 370
Biopreservatives
Biopreservatives in meat products, 721
Biosensor
Rapid detection of *Salmonella* in poultry samples, 1043
BioSys
Conventional versus rapid methods for counting *E. coli,* 1179
BioTox test
Microbial methods for detection of cleaning chemical residues, 210
Biotyping
Yersinia in raw and precooked meat in Mexico, 542
Botrytis cinerea
Biocontrol of *B. cinerea* on strawberry fruits, 386
Botulinal toxin
Botulinal toxigenesis in modified atmosphere packaged cooked turkey, 1511
Botulinum toxin E production
Pathogens and toxin production associated with crawfish, 1687
Botulism
C. botulinum riboprinting, 1347
Bovine spongiform encephalopathy (BSE)
Animal materials in food and feed, 1602
CNS tissue in meat products, 258
Bread
C. jejuni in butter, 120
Broccoli
Activity of myrosinase from broccoli, 400
Biofilms on alfalfa sprouts, 625
Broiler carcasses
Acidified sodium chlorite treatment of broiler carcasses, 1087
Broilers
Prevalence of *Salmonella* spp. in Korea, 655
Broiler skin
Nisin-coated polymer films, 1189
Broiling
E. coli O157:H7 and *L. monocytogenes* destruction in gound beef, 894
Bromine water
Roles of ORP in EO water for microbial inactivation, 19
Buffalo
Enzyme activity in buffalo milk, 970
Butter
C. jejuni in butter, 120
Buttermilk
E. coli O157:H7 in buttermilk, 441

Ca^{2+}
Aflatoxin B_1 degradation and divalent cations, 102
Caco-2 cells
Enzymatic quantification of *Bifidobacterium,* 322
Cadaverine
Biogenic amines in fermented sausages, 1544
Caliciviruses
Norwalk-like virus sequences in commercial mineral waters, 1576
Calves
Dietary effects on *E. coli* O157:H7 shedding in calves, 1630
Campylobacter
Campylobacter outbreak traced to chicken, 309
C. jejuni in butter, 120
Diminution of *Campylobacter* colonization, 1430
Multiple *Campylobacter* subtypes from meat, 1654
PCR detection of *C. jejuni,* 299
Campylobacter coli
Campylobacter in roasted chicken samples, 117
Campylobacter jejuni
Campylobacter in roasted chicken samples, 117
C. jejuni reduction in a simulated chicken digestive tract, 1594
Campylobacter spp.
Campylobacter isolation and identification from chicken, 304
Enzyme immunoassay for *Campylobacter,* 489
Candidiasis
Heat-killed probiotics for candidiasis, 638
Capillary
Comparison of mold spore analysis procedures, 1404

Capillary tubes
Survival of *L. monocytogenes* in pasteurized egg products, 921
Carbamates
Enzyme inhibition assay for carbamates, 1758
Carbon-composite
Patulin adsorption with carbon-composite adsorbents, 106
Carbon dioxide
Pressurized CO_2 on cheese cultures, 758
Carcass
Antimicrobial effect of herb extracts on beef, 601
Beef carcass decontamination, 1080
Evaluation of the two rapid *E. coli* O157 methods, 860
Pathogen interventions on beef, 1326
Sheep carcass dressing, 1291
Carcass sampling
Carcass sampling, 167
Carrot juice
Pepsin-digested lactoferrin in carrot juice, 376
Carvacrol
Antimicrobial activity of carvacrol on rice, 620
Casein
Pressurized CO_2 on cheese cultures, 758
Catfish
Chlordane and toxaphene residues, 763
Grovac process, 1231
Catfish processing
Grovac process, 1231
Cationic peptide
Antimicrobial activity of a synthetic peptide, 889
Cattle
Grain diets and *E. coli* O157:H7 shedding, 1467
Helicobacter pylori in cattle and beef products, 174
Salmonella serotypes in beef cows, 1648
Cattle abattoir
Aerobiology of cattle abattoir, 1523
Cecum
Bacteria in pig intestines, 1253
Cellulase
Antibacterial activity of a chitooligosaccharide, 747
Centralized packaging
Centralized packaging of retail-ready meat, 796
Central nervous system
CNS tissue in meat products, 258
Cetylpyridinium chloride (CPC)
CPC treatments of beef, 593
Ceviche
V. cholerae in ceviche, 445
Channel catfish
L. monocytogenes from channel catfish, 613
Characterization
Kimchi bacteriocin, 1707
Cheese(s)
Animal species identification, 408
Furosine content in Spanish commercial cheeses, 974
Cheese cultures
Pressurized CO_2 on cheese cultures, 758
Cheese ripening
Surface spreading of *Listeria* on smear cheese, 1353
Chemical
Preservation of fish cutlet, 56
Chicken(s)
Conventional versus rapid methods for counting *E. coli,* 1179
In vivo assays on chicks with a probiotic strain, 1333
In vivo binding of aflatoxin B_1 by selected bacterial strains, 549
Yersinia in raw and precooked meat in Mexico, 542
Chicken carcasses
Y. enterocolitica in chicken carcasses, 1591
Chilled storage
Microbiological quality of pressure-treated sausages, 1093
Chitooligosaccharides
Antibacterial activity of a chitooligosaccharide, 747
Chitosan
Chitosan in mayonnaise, 202
Chlorate
Effect of chlorate on *E. coli* O157:H7 and *Salmonella* Typhimurium, 1038
Chlordane
Chlordane and toxaphene residues, 763
Chlorinated water
S. sonnei on parsley, 568
Chlorine
E. coli in apple juice, 1021
Penetration of *E. coli* into lettuce tissues, 434
Chlorine water
Roles of ORP in EO water for microbial inactivation, 19
Chocolate milk
Chocolate milk spoilage patterns, 516
Cholera
V. cholerae in ceviche, 445
Cholesterol neuron specific enolase
CNS tissue in meat products, 258
Chromogenic medium
Chromogenic medium for food yeasts, 651
Cider
E. coli removal from whole apples, 703
Citrobacter freundii
Specificity of conductance *Escherichia coli* assay, 264
Citrus
Surface decontamination of orange fruit, 961
Cleaning
Ozone as a terminal disinfectant, 1100
Clostridium botulinum
Calculation of spores survival, 190
C. botulinum riboprinting, 1347
Modeling germination kinetics of *C. botulinum* spores, 1071
Clostridium sporogenes
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Clover
Biofilms on alfalfa sprouts, 625

CM medium
Specificity of conductance *Escherichia coli* assay, 264
Cold-smoke
Survival of *Listeria* on cold-smoked salmon, 715
Coliform counts
Detection of STEC in beef, 1167
Coliform enumeration
Evaluation of the petrifilm RCC plate method, 123
Coliforms
Bacteria in a multiple-tank poultry scalder, 1184
Efficacy of chromocult agar, 539
Microbiology of chilled chicken, 1228
Petrifilm Series 2000, 1137
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126
Color
Electron beam irradiation and red paprika, 633
End point temperature and visual assessments in cooked beef patties, 1389
Compactdry
Compactdry TC evaluation, 665
Compatible solute
Staphylococcal enterotoxin biosynthesis at low water activity, 473
Competitive exclusion
Salmonella in molted laying hens, 545
Conductance
Specificity of conductance *Escherichia coli* assay, 264
Confocal scanning electron microscopy
Penetration of *E. coli* into lettuce tissues, 434
Consumer food safety
Consumer food safety, 1725
Contamination
Carcass palpation in lambs, 1287
Cooked and cured ham
Glucose and tagatose effects on bacterial growth, 71
Cooked cured meat pigment
Genotoxicity of cooked cured meat pigment, 945
Cooked meat
Microbial evaluation of foods in university restaurants, 1273
Cooked sausages
Microbiological quality of pressure-treated sausages, 1093
Cooking
Chlordane and toxaphene residues, 763
Cosmetics
Recalls of foods and cosmetics due to microbial contamination, 1113
Cost effectiveness
Hepatitis A vaccination of food service workers, 768
Crawfish
Pathogens and toxin production associated with crawfish, 1687
Criteria
Criteria for food allergen priority, 982
Critical control points
Validation of acid washes as critical control points, 1676
Cross protection
Effect of pH on *E. coli*, 12
Cryptosporidium
Epidemiology, microbiology, and risk assessment of waterborne pathogens, 827
Isolation of parasites from fruits and vegetables, 775
Treatment of fruit juices by HHP, 1262
Cured and smoked ham
The mycobiota of Speck, 1399
Cured meat
Surface inhibition of bacteria on cured meat, 1338
Cyclospora
Isolation of *Cyclospora* oocysts from fruits and vegetables, 1410
Cymene
Antimicrobial activity of carvacrol on rice, 620

Dairy microbiology
Fluctuating microbial counts in raw milk, 1240
Dairy products
Heat inactivation of HAV, 522
Death kinetics
A distribution approach to death kinetics, 1197
Decontamination
Antimicrobial effect of herb extracts on beef, 601
Beef carcass decontamination, 1080
Beef variety meat decontamination, 44
CPC treatments of beef, 593
Pathogen interventions on beef, 1326
Surface decontamination of orange fruit, 961
Degradation
Aflatoxin B_1 degradation and divalent cations, 102
Dekkera anomala
Transport of acetic acid in *D. anomala*, 96
Desoxycholate lactose agar
Evaluation of the Petrifilm RCC plate method, 123
Detection
BAX for screening/genus *Listeria*, 343
Molecular beacon PCR for *E. coli* O157:H7, 855
Quantitative detection of *L. monocytogenes*, 347
Rapid detection of *Salmonella* in poultry samples, 1043
Detoxification
In vivo binding of aflatoxin B_1 by selected bacterial strains, 549
Diarrhea
Clinical pathology of foodborne diseases, 822
Diet
Dietary effects on *E. coli* O157:H7 shedding in calves, 1630
Grain diets and *E. coli* O157:H7 shedding, 1467
Differential medium
Differential medium for *Z. bailii*, 1570
Differentiation
Identification and differentiation of *L. monocytogenes*, 332
Disinfectant
Real-soil hand disinfection model, 495
Salmonella on alfalfa seeds, 1475
Survival and growth of *Alicyclobacillus*, 1117

Disinfection
Ozone as a terminal disinfectant, 1100
Penetration of *E. coli* into lettuce tissues, 434
Distribution
A distribution approach to death kinetics, 1197
DNA
Animal species identification, 408
DNA probe membrane
Membrane-based detection of *Listeria* in food, 337
Doneness
End point temperature and visual assessments in cooked beef patties, 1389
DPD-FEAS
pH effect on free chlorine species in EO water, 1534
Dressing
Sheep carcass dressing, 1291
Dressings
Microbiological safety of dressings, 1144
Dry sheet medium
Compactdry TC evaluation, 665
D-value(s)
Prevalence of *Salmonella* spp. in Korea, 655
Survival of *L. monocytogenes* in pasteurized egg products, 921
Thermal resistance of *Salmonella,* 779

EC medium
Growth of *E. coli* O157:H7 at 45.5°C, 1173
Ecological factors
Influence of ecological factors on verrucosidin production, 231
EDTA
Surface inhibition of bacteria on cured meat, 1338
EGFP
Visualization of *E. coli*–beef interaction, 427
Egg products
E. coli O157:H7 and *L. monocytogenes* in egg products, 907
Egg(s)
Salmonella and flies, 958
Salmonella Enteritidis in hard-cooked eggs, 36
Eggshell
Sanitizing *Yersinia*-contaminated eggs, 1053
EIA
Enzyme immunoassay for *Campylobacter,* 489
Electrolyzed oxidizing water
pH effect on free chlorine species in EO water, 1534
Roles of ORP in EO water for microbial inactivation, 19
Electron beam
Electron beam irradiation and red paprika, 633
Electron beam irradiation
Radiation effects on selected bacteria, 162
ELISA
ELISA for almond proteins in food, 252
Immunochemical detection of molds, 281
Emerging infections
Foodborne diseases active surveillance network, 807
End point temperature
End point temperature and visual assessments in cooked beef patties, 1389
Enrichment
Evaluation of enrichment efficacy, 1064
Enteritis
Multiple *Campylobacter* subtypes from meat, 1654
Enterocins
Biopreservatives in meat products, 721
Enterococci
Vancomycin-resistant enterococci in raw meat, 912
Enterococcus
Evaluation of enrichment efficacy, 1064
Enterococcus faecium
In vivo assays on chicks with a probiotic strain, 1333
Enterococcus spp.
Indicator bacteria on beef carcasses, 51
Enterohemorrhagic *E. coli*
Pathogen interventions on beef, 1326
Enterotoxigenic
Rapid detection of enterotoxigenic *E. coli,* 534
Enterotoxin(s)
S. aureus enterotoxins detected by PCR, 479
Staphylococcal enterotoxin biosynthesis at low water activity, 473
Enumeration
Quantitative detection of *L. monocytogenes,* 347
Rapid enumeration of *Listeria monocytogenes,* 354
Environment
yadA-positive *Y. enterocolitica* in a pig slaughterhouse, 31
Enzyme inhibition
Enzyme inhibition assay for carbamates, 1758
Enzymes
Enzyme activity in buffalo milk, 970
Epidemiology
Helicobacter pylori in cattle and beef products, 174
Epinephelus guaza
PCR-RFLP identification of fish species, 1248
Equipment sanitation
Iberian pig slaughterhouse contamination, 1670
Equipment surfaces
Microbial methods for detection of cleaning chemical residues, 210
Escherichia coli
Bacteria in a multiple-tank poultry scalder, 1184
Bacteria in pig intestines, 1253
Bactericidal activity of allyl isothiocyanate, 727
Carcass sampling, 167
Combined antimicrobial effect of hop resins, 735
Conventional versus rapid methods for counting *E. coli,* 1179
Detection of STEC in beef, 1167
E. coli inactivation by combined pulsed electric fields and nisin, 741
Indicator bacteria on beef carcasses, 51
Pepsin-digested lactoferrin in carrot juice, 376
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126

Sheep carcass dressing, 1291
Shiga toxin-producing *E. coli* on Prince Edward Island, 1583
Specificity of conductance *Escherichia coli* assay, 264
Escherichia coli enumeration
Efficacy of chromocult agar, 539
Escherichia coli inactivation
E. coli inactivated by combined processing treatments, 884
Escherichia coli O157:H7
Antimicrobial activity of a synthetic peptide, 889
Antimicrobial effect of herb extracts on beef, 601
Bacterial attachment to lettuce leaves, 1433
Bactericidal activity of isothiocyanate, 25
CPC treatments of beef, 593
Detection of *E. coli* O157:H7 using PCR, 1032
Dietary effects on *E. coli* O157:H7 shedding in calves, 1630
E. coli in apple juice, 1021
E. coli O157:H7 and *L. monocytogenes* destruction in gound beef, 894
E. coli O157:H7 and *L. monocytogenes* in egg products, 907
E. coli O157:H7 association and penetration into beef tissue, 3
E. coli O157:H7 in apple cider, 1026
E. coli O157:H7 in buttermilk, 441
E. coli O157:H7 in the presence of plant pathogens on apples, 1637
E. coli removal from whole apples, 703
Effect of chlorate on *E. coli* O157:H7 and *Salmonella* Typhimurium, 1038
Effect of pH on *E. coli,* 12
Evaluation of the two rapid *E. coli* O157 methods, 860
Fate of *Listeria, E. coli* O157:H7, and *Salmonella* in Labneh, 608
Grain diets and *E. coli* O157:H7 shedding, 1467
Growth of *E. coli* O157:H7 at 45.5°C, 1173
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Molecular beacon PCR for *E. coli* O157:H7, 855
Penetration of *E. coli* into lettuce tissues, 434
Recalls of foods and cosmetics due to microbial contamination, 1113
Roles of ORP in EO water for microbial inactivation, 19
Starvation in *E. coli* O157:H7
Stimulation of starter culture, 1492
UV reduction of *E. coli* O157:H7 in cider, 563
Visualization of *E. coli*–beef interaction, 427
Escherichai coli O6
Rapid detection of enterotoxigenic *E. coli,* 534
Ewe's milk
Detection of alkaline phosphatase activity in ewe's milk, 1258
Excimer radiation
UV disinfection of water, 1529
Excision
Carcass sampling, 167
Exposure
Mucosal starter culture *Salmonella* reduction, 867

Fecally contaminated milkborne epidemic
Milkborne *Campylobacter* infection, 1426
Fecal shedding
Grain diets and *E. coli* O157:H7 shedding, 1467
Feces
Detection of *E. coli* O157:H7 using PCR, 1032
Dietary effects on *E. coli* O157:H7 shedding in calves, 1630
Evaluation of the two rapid *E. coli* O157 methods, 860
Fermentation
Biogenic amines in table olives, 111
Fermented milk
Inhibitory power of kefir, 364
Fermented sausages
Biogenic amine reduction in fermented sausages, 237
Biogenic amines in fermented sausages, 1544
Control of biogenic amine production in fermented sausages, 1556
Fermented tea
Kombucha, the fermented tea, 976
Feta
Animal species identification, 408
Fish
Salmonella in fish and seafood, 579
Survival of *Listeria* on cold-smoked salmon. 715
Fish cutlet
Preservation of fish cutlet, 56
Fixed-bed adsorption
Patulin adsorption with carbon-composite adsorbents, 106
Flavobacteriaceae
Psychrobacter in freshwater fish, 315
Flavobacterium aurantiacum
Aflatoxin B_1 degradation and divalent cations, 102
Enzymatic degradation of aflatoxin, 415
Flight catering
S. aureus carriage, PFGE types, and enterotoxicity, 1487
Fluorescamine
Simultaneous determination of penicillin residues by HPLC, 1421
Fluorophos
Detection of alkaline phosphatase activity in ewe's milk, 1258
Fly
Salmonella and flies, 958
Food(s)
Antimicrobial activity of a synthetic peptide, 889
Chromogenic medium for food yeasts, 651
Detection of *E. coli* O157:H7 using PCR, 1032
Isolation of *Cyclospora* oocysts from fruits and vegetables, 1410
Multiplex PCR for *B. cereus,* 1496
PCR detection of *C. jejuni,* 299
Recalls of foods and cosmetics due to microbial contamination, 1113

Spore inhibition by pressure, heat, and chemical preservatives, 1503
Vancomycin-resistant enterococci in raw meat, 912
Food allergens
Criteria for food allergen priority, 982
Food allergy
ELISA for almond proteins in food, 252
Foodborne disease(s)
Foodborne disease incidents in Sweden, 1315
Food handlers and foodborne diseases, 381
High-risk food consumption, food handling, 1538
Foodborne illness
Characterization of *V. parahaemolyticus* in Taiwan, 900
Foodborne diseases active surveillance network, 807
Foodborne microorganisms
Antimicrobial activity of a synthetic peptide, 889
Antimicrobial activity of rosemary, 1359
Foodborne pathogens
Hepatitis A vaccination of food service workers, 768
Foodborne viruses
Detection of viruses in foods, 1738
Food contamination
Norwalk-like virus sequences in commercial mineral waters, 1576
Food handler(s)
Food handlers and foodborne diseases, 381
S. aureus carriage, PFGE types, and enterotoxicity, 1487
Food handling
High-risk food consumption, food handling, 1538
Food industry
Ozone as a terminal disinfectant, 1100
Food microbiology
Compactdry TC evaluation, 665
Food model
Antimicrobial activity of rosemary, 1359
Food poisoning
S. aureus enterotoxins detected by PCR, 479
Food quality
Chemical data evaluation for soft drinks, 1719
Food safety
Acidified sodium chlorite treatment of broiler carcasses, 1087
Fluctuating microbial counts in raw milk, 1240
Microbiology of potatoes, 668
Food safety education
Consumer food safety, 1725
Evaluation of safe food-handling labels, 1321
Food safety knowledge
Consumer food safety, 1725
Food safety practices
Consumer food safety, 1725
Food spoilage
Models for growth of Z. *bailii*, 222
Mycology of phane, 137
Food suspensions
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126
Food worker
Real-soil hand disinfection model, 495
Fragment length
Identification and differentiation of *L. monocytogenes*, 332
Fresh pasta
Water activity and pH of fresh pasta, 965
Fresh pork sausage
Lacticin 3147 in pork sausage, 370
Freshwater fish
Psychrobacter in freshwater fish, 315
Fried fish fiber
Heterocyclic amines in fried fish fiber, 1415
Fructose-6-phosphate phosphoketolase
Enzymatic quantification of *Bifidobacterium*, 322
Fruit
Isolation of *Cyclospora* oocysts from fruits and vegetables, 1410
Fumonisins
Occurrence of fumonisins and moniliformin, 1732
Fungal contamination
Mycology of phane, 137
Furosine
Furosine content in Spanish commercial cheeses, 974
Fusarium
Immunochemical detection of molds, 281

ß-Galactosidase
Bactericidal activity of allyl isothiocyanate, 727
Dairy propionibacteria subjected to digestion, 1214
Galangal
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Gamma irradiation
Possibility of inhibition of shrimp allergy by ionizing radiation, 940
Radiation effects on selected bacteria, 162
Gamma radiation
Processing of low-salted and fermented squid using gamma radiation, 934
Garlic
C. jejuni in butter, 120
Gastric digestion
Dairy propionibacteria subjected to digestion, 1214
Gastroenteritis
Campylobacter outbreak traced to chicken, 309
Genotoxicity
Genotoxicity of cooked cured meat pigment, 945
Germination
Modeling germination kinetics of *C. botulinum* spores, 1071
Giardia
Isolation of parasites from fruits and vegetables, 775
Glial fibrillary acetic protein
CNS tissue in meat products, 258
Glomerella cingulata
E. coli O157:H7 in the presence of plant pathogens on apples, 1637
L-Glucose
Glucose and tagatose effects on bacterial growth, 71

Goat's milk
L. monocytogenes in goat's milk, 1208
Good manufacturing practices
Use of microbial data for HACCP verification, 810
Grain
Grain diets and *E. coli* O157:H7 shedding, 1467
Grills
E. coli O157:H7 and *L. monocytogenes* destruction in gound beef, 894
Ground beef
Antimicrobial effect of herb extracts on beef, 601
Conventional versus rapid methods for counting *E. coli*, 1179
Methods comparison for isolation of *Y. enterocolitica*, 1483
The inadequacies of O157:H7 meat testing, 819
Ground beef patties
End point temperature and visual assessments in cooked beef patties, 1389
Ground pork
Methods comparison for isolation of *Y. enterocolitica*, 1483
Growth
Growth of *E. coli* O157:H7 at 45.5°C, 1173
Growth and survival
E. coli O157:H7 and *L. monocytogenes* in egg products, 907
Guaiacol
Detection of guaiacol in apple juice, 1517
Gut mucosa morphology
Gut mucosa morphology and microflora changes, 83

HACCP
Validation of acid washes as critical control points, 1676
HACCP verification
Microbiological verification of HACCP system, 1681
Hamburger patties
E. coli O157:H7 and *L. monocytogenes* destruction in gound beef, 894
Hand
Carcass palpation in lambs, 1287
Handwash
Real-soil hand disinfection model, 495
Hard Italian-type cheeses
Indicator bacteria in hard Italian-type cheeses, 1697
Hazard analysis and critical control point
Aerobiology of cattle abattoir, 1523
Microbial data for verification—industry perspectives, 815
Microbial methods for detection of cleaning chemical residues, 210
Use of microbial data for HACCP verification, 810
Heat
Effect of pH on *E. coli*, 12
Thermal resistance of *Salmonella*, 779
Thermal stability of moniliformin, 1598
Heat inactivation
E. coli in apple juice, 1021
Enzyme activity in buffalo milk, 970
Heat inactivation of HAV, 522
Heat-injured
Comparison of reducing agents for *L. monocytogenes*, 1058
Heat resistance
Heat resistance of *A. acidocaldarius*, 1377
Starvation in *E. coli* O157:H7
Heat treatment
Vacuum-packaged whey cheese, 216
Helicobacter pylori
Helicobacter pylori in cattle and beef products, 174
Hemolysin BL
Multiplex PCR for *B. cereus*, 1496
Hemolytic uremic syndrome
The inadequacies of O157:H7 meat testing, 819
Hepatitis A
Hepatitis A vaccination of food service workers, 768
Hepatitis A virus
Detection of viruses in foods, 1738
Heat inactivation of HAV, 522
Herbal extract
Antimicrobial effect of herb extracts on beef, 601
Heterocyclic amines
Heterocyclic amines in fried fish fiber, 1415
HGMF
Enzyme immunoassay for *Campylobacter*, 489
High hydrostatic pressure
Spore inhibition by pressure, heat, and chemical preservatives, 1503
High-performance liquid chromatography
Heterocyclic amines in fried fish fiber, 1415
Simultaneous determination of penicillin residues by HPLC, 1421
High pH
E. coli O157:H7 association and penetration into beef tissue, 3
High pressure
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Oyster preservation by high pressure, 196
Shelf life of prawns after high-pressure treatment, 1381
Treatment of fruit juices by HHP, 1262
High pressure processing
Inactivation of *L. monocytogenes* in frankurters, 662
Microbiological quality of pressure-treated sausages, 1093
High-risk food
High-risk food consumption, food handling, 1538
Hispánico cheese
Biogenic amines in cheese, 1551
Histamine
Histamine and biogenic amine production by *M. morganii*, 244
Hop resins
Combined antimicrobial effect of hop resins, 735
Hot dogs
Hot dog pasteurization, 457
H_2S production
Improvement of MLCB agar, 1643

Humectant
Staphylococcal enterotoxin biosynthesis at low water activity, 473
Hydrocarbons
Hydrocarbons and 2-alkylcyclobutanones in irradiated perilla seeds, 1563
Hydrochloric acid
Roles of ORP in EO water for microbial inactivation, 19
Hydrophobic grid membrane filters
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126
Hydrostatic pressure
E. coli inactivated by combined processing treatments, 884
Hypochlorite
Sanitizing *Yersinia*-contaminated eggs, 1053
Hypochlorite ion
pH effect on free chlorine species in EO water, 1534
Hypochlorous acid
E. coli in apple juice, 1021
pH effect on free chlorine species in EO water, 1534

Iberian pig slaughterhouse
Iberian pig slaughterhouse contamination, 1670
Ice
Microbiological quality of ice, 78
Iceberg lettuce
Bacterial attachment to lettuce leaves, 1433
Identification
Campylobacter isolation and identification from chicken, 304
Identification and differentiation of *L. monocytogenes*, 332
Kimchi bacteriocin, 1707
Immunoblot
Detection of STEC in beef, 1167
Immunohistochemistry
Spinal cord in AMRS product, 1107
Immunomagnetic separation
Detection of *E. coli* O157:H7 using PCR, 1032
Rapid detection of *Salmonella* in poultry samples, 1043
Inactivation
Inactivation of bacteriophages, 509
Treatment of fruit juices by HHP, 1262
Incidence
Foodborne disease incidents in Sweden, 1315
Incidence and characterization of *L. monocytogenes*, 186
Salmonella in fish and seafood, 579
Induced molting
Salmonella in molted laying hens, 545
Infectious disease
Epidemiology, microbiology, and risk assessment of waterborne pathogens, 827
Inhibition
Inhibitory power of kefir, 364
Inhibition zone test
Microbial methods for detection of cleaning chemical residues, 210
Inoculum
Clinical pathology of foodborne diseases, 822
Inspection
Carcass palpation in lambs, 1287
Intestinal fluid
Dairy propionibacteria subjected to digestion, 1214
Invasion genes
SCFA modulation of *Salmonella hilA* and *invF* genes, 573
Inverted dressing
Sheep carcass dressing, 1291
Iodometric
pH effect on free chlorine species in EO water, 1534
Iron
Roles of ORP in EO water for microbial inactivation, 19
Irradiation
Competition of *L. monocytogenes* with normal flora, 1702
Electron beam irradiation and red paprika, 633
Preservation of fish cutlet, 56
Reduction of *Salmonella* and *E. coli* O157:H7 by gamma radiation on sprouts, 871
ISO-GRID HGMF
Rapid enumeration of *Listeria monocytogenes*, 354
Isolation
Campylobacter isolation and identification from chicken, 304
Isolation of *Cyclospora* oocysts from fruits and vegetables, 1410
Isolation of parasites from fruits and vegetables, 775
Methods comparison for isolation of *Y. enterocolitica*, 1483
Y. enterocolitica in chicken carcasses, 1591
Isothiocyanate
Bactericidal activity of isothiocyanate, 25
Italy
Aeromonas spp. in ready-to-eat foods, 1754
Food handlers and foodborne diseases, 381

Jeotkal
Processing of low-salted and fermented squid using gamma radiation, 934
Juice(s)
Isolation of nontuberculous mycobacteria from foods, 930
Surface decontamination of orange fruit, 961
Treatment of fruit juices by HHP, 1262

Kahawai
Thermal death of histamine-producing bacteria in seafood, 277
Kefir
Inhibitory power of kefir, 364
Kimchi
Kimchi bacteriocin, 1707
Kinetics
Calculation of spores survival, 190
Modeling germination kinetics of *C. botulinum* spores, 1071

Knowledge
Food handlers and foodborne diseases, 381
Kombucha
Kombucha, the fermented tea, 976
Korean soybean paste
Aflatoxin reduction by Korean soybean paste, 1295
K-sorbate
B. cereus growth on solid media, 926

Labeling
Criteria for food allergen priority, 982
Labneh
Fate of *Listeria, E. coli* O157:H7, and *Salmonella* in Labneh, 608
Lactic acid
Lactic acid and nisin effects on *Listeria monocytogenes* on beef, 131
Lactic acid bacteria
Biogenic amine reduction in fermented sausages, 237
Chitosan in mayonnaise, 202
Inhibitory power of kefir, 364
In vivo binding of aflatoxin B_1 by selected bacterial strains, 549
Lactic acid bacteria inhibit *Listeria,* 916
Probiotics in removal of aflatoxin, 412
Removal of aflatoxin M_1 by lactic acid bacteria, 645
Lacticin BH5
Kimchi bacteriocin, 1707
Lacticin 3147
Lacticin 3147 in pork sausage, 370
Lactobacilli
C. jejuni reduction in a simulated chicken digestive tract, 1594
Conjugated bile salts and antibiotic susceptibility, 1369
Control of biogenic amine production in fermented sausages, 1556
Heat-killed probiotics for candidiasis, 638
Lactobacillus casei
Gut mucosa morphology and microflora changes, 83
Lactococcus lactis
Kimchi bacteriocin, 1707
Lactoferricin
Pepsin-digested lactoferrin in carrot juice, 376
Lactoferrin
Pepsin-digested lactoferrin in carrot juice, 376
Lamb
Carcass palpation in lambs, 1287
Laser
Inactivation of *Bacillus* spores by UV laser irradiation, 753
Lates niloticus
PCR-RFLP identification of fish species, 1248
Lettuce
Bactericidal activity of isothiocyanate, 25
Penetration of *E. coli* into lettuce tissues, 434
Linoleic acid
Aflatoxin reduction by Korean soybean paste, 1295
Liquid chromatography–atmospheric pressure ionization–mass spectrometry
Influence of ecological factors on verrucosidin production, 231
Liquid egg pasteurization
Inactivation of *Salmonella* by ultrasonic waves, 451
Liquid egg products
Survival of *L. monocytogenes* in pasteurized egg products, 921
Liquid-holding recovery
UV inactivation and repair of pathogenic *E. coli* strains, 1015
Listeria
BAX for screening/genus *Listeria,* 343
Biopreservatives in meat products, 721
Evaluation of enrichment efficacy, 1064
Surface spreading of *Listeria* on smear cheese, 1353
Survival of *Listeria* on cold-smoked salmon. 715
Listeria monocytogenes
Antimicrobial effect of herb extracts on beef, 601
Bacterial attachment to lettuce leaves, 1433
Comparison of reducing agents for *L. monocytogenes,* 1058
Competition of *L. monocytogenes* with normal flora, 1702
E. coli O157:H7 and *L. monocytogenes* destruction in gound beef, 894
E. coli O157:H7 and *L. monocytogenes* in egg products, 907
Enhanced adherence of persistent *L. monocytogenes* strains, 1204
Fate of *Listeria, E. coli* O157:H7, and *Salmonella* in Labneh, 608
Identification and differentiation of *L. monocytogenes,* 332
Inactivation of *L. monocytogenes* in frankurters, 662
Incidence and characterization of *L. monocytogenes,* 186
Lactic acid and nisin effects on *Listeria monocytogenes* on beef, 131
Lactic acid bacteria inhibit *Listeria,* 916
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Listeria ribotype analysis, 179
L. monocytogenes from channel catfish, 613
L. monocytogenes in goat's milk, 1208
L. monocytogenes in pig slaughterhouses, 1438
Membrane-based detection of *Listeria* in food, 337
Quantitative detection of *L. monocytogenes,* 347
Rapid enumeration of *Listeria monocytogenes,* 354
Recovery-enrichment system for *L. monocytogenes,* 462
Stimulation of starter culture, 1492
Survival of *L. monocytogenes* in pasteurized egg products, 921
Listeria spp.
TGGE in identifying *Listeria,* 659
Low salt
Processing of low-salted and fermented squid using gamma radiation, 934
LSCM
Visualization of *E. coli*–beef interaction, 427

Luciferase
Detection of tetracycline residues in milk, 953
Lysozyme
Surface inhibition of bacteria on cured meat, 1338

Malic acid
E. coli O157:H7 in apple cider, 1026
Malnourished mice
Gut mucosa morphology and microflora changes, 83
Manchurian mushroom
Kombucha, the fermented tea, 976
Manganese ion
Stimulation of starter culture, 1492
Manosonication
Inactivation of *Salmonella* by ultrasonic waves, 451
Manothermosonication
Inactivation of *Salmonella* by ultrasonic waves, 451
Master packaging
Centralized packaging of retail-ready meat, 796
Mathematical models
Fluctuating microbial counts in raw milk, 1240
Mayonnaise
Chitosan in mayonnaise, 202
Microbiological safety of dressings, 1144
Meat
Inactivation of *L. monocytogenes* in frankurters, 662
Meat, quality testing, 1447
Multiple *Campylobacter* subtypes from meat, 1654
Meat emulsion coagulates
Genotoxicity of cooked cured meat pigment, 945
Meat microbiology
Iberian pig slaughterhouse contamination, 1670
Meat product(s)
Biopreservatives in meat products, 721
Influence of ecological factors on verrucosidin production, 231
Meat quality
Biogenic amines in fermented sausages, 1544
Media comparisons
Improved *Salmonella* medium, 1443
Melanosis
Shelf life of prawns after high-pressure treatment, 1381
Membrane
Bactericidal activity of allyl isothiocyanate, 727
Membrane filtration
Enzyme immunoassay for *Campylobacter,* 489
Mercury UV
UV disinfection of water, 1529
Mesophiles
Microbiology of chilled chicken, 1228
Metals
Heavy metals in mussels, 273
Mg^{2+}
Aflatoxin B_1 degradation and divalent cations, 102
Mice
Heat-killed probiotics for candidiasis, 638
Microbes
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Microbial criteria
Microbial data for verification—industry perspectives, 815
Microbial ecology
Salmonella in Brazilian poultry slaughterhouses, 1749
Microbial enzymes
Meat, quality testing, 1447
Microbial evaluation
Microbial evaluation of foods in university restaurants, 1273
Microbial growth modeling
Growth of *Bacillus cereus* in rice, 268
Microbial mortality
Calculation of spores survival, 190
Microbial testing
Microbial data for verification—industry perspectives, 815
Microbiological
Preservation of fish cutlet, 56
Use of microbial data for HACCP verification, 810
Microbiological contamination
Iberian pig slaughterhouse contamination, 1670
Microbiological history
Microbiological data, 832
Microbiological quality
Microbiological quality of ice, 78
Microbiological safety
Microbiological safety of dressings, 1144
Microbiological testing
Microbiological data, 832
Microbiology
Microbiological verification of HACCP system, 1681
Microbiology of potatoes, 668
Simultaneous effect of salt and smoke on cold-smoked salmon microflora, 502
Surface inhibition of bacteria on cured meat, 1338
Vacuum-packaged whey cheese, 216
Microflora
Gut mucosa morphology and microflora changes, 83
Microorganisms
Electron beam irradiation and red paprika, 633
Oyster preservation by high pressure, 196
Shelf life of prawns after high-pressure treatment, 1381
Microstructure
B. cereus growth on solid media, 926
Milk
Enzyme activity in buffalo milk, 970
Fluctuating microbial counts in raw milk, 1240
Pressurized CO_2 on cheese cultures, 758
Viability of bifidobacteria, 327
Milk preservation
Antibacterial activity of a chitooligosaccharide, 747
Mineral water
Norwalk-like virus sequences in commercial mineral waters, 1576
MLCB agar
Improvement of MLCB agar, 1643

Modeling
Modeling germination kinetics of *C. botulinum* spores, 1071
Modified atmosphere packaging
Botulinal toxigenesis in modified atmosphere packaged cooked turkey, 1511
Modified atmospheres
Competition of *L. monocytogenes* with normal flora, 1702
Mold(s)
Antimicrobial(s) of a pozol isolate, 1123
Immunochemical detection of molds, 281
The mycobiota of Speck, 1399
Mold count and propagules
Occurrence of fumonisins and moniliformin, 1732
Mold spore
Comparison of mold spore analysis procedures, 1404
Molecular beacon
Molecular beacon PCR for *E. coli* O157:H7, 855
Molecular evolution
Listeria ribotype analysis, 179
Molecular fingerprinting
Listeria ribotype analysis, 179
Moniliformin
Occurrence of fumonisins and moniliformin, 1732
Thermal stability of moniliformin, 1598
Monoclonal antibody
Rapid detection of enterotoxigenic *E. coli,* 534
Monolaurin
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Monte Carlo simulation
UV inactivation of *E. coli,* 1587
Moraxellaceae
Psychrobacter in freshwater fish, 315
Morganella morganii
Histamine and biogenic amine production by *M. morganii,* 244
Thermal death of histamine-producing bacteria in seafood, 277
Mozzarella
Animal species identification, 408
MSC
Mucosal starter culture *Salmonella* reduction, 867
Mucosal immunity
Clinical pathology of foodborne diseases, 822
Multiplex PCR
Multiplex PCR for *B. cereus,* 1496
Musca domestica
Salmonella and flies, 958
Musculature
Anisakids in muscle of Argentinean hake, 1141
Mussels
Heavy metals in mussels, 273
Mutants
Growth of *E. coli* O157:H7 at 45.5°C, 1173
Mycotoxin
Patulin adsorption with carbon-composite adsorbents, 106
Myrosinase
Activity of myrosinase from broccoli, 400

NaCl
B. cereus growth on solid media, 926
Nalidixic acid elongation
Penetration of *E. coli* into lettuce tissues, 434
Natural antioxidants
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Neonates
Diminution of *Campylobacter* colonization, 1430
Neural network
Chemical data evaluation for soft drinks, 1719
Nisin
E. coli inactivation by combined pulsed electric fields and nisin, 741
Lactic acid and nisin effects on *Listeria monocytogenes* on beef, 131
Lacticin 3147 in pork sausage, 370
Nisin-coated polymer films, 1189
Nisin-containing films, 1268
Surface inhibition of bacteria on cured meat, 1338
Nonisotopic probes
Detection of *V. parahaemolyticus tdh* gene, 1660
Nonproteolytic *Clostridium botulinum*
Botulinal toxigenesis in modified atmosphere packaged cooked turkey, 1511
Nontuberculous mycobacteria
Isolation of nontuberculous mycobacteria from foods, 930
Norwalk-like viruses
Norwalk-like virus sequences in commercial mineral waters, 1576
Norwalk virus
Detection of viruses in foods, 1738
Nurseries
Diminution of *Campylobacter* colonization, 1430

Oleic acid
Reduction of poultry bacteria with oleic acid, 1282
Organic acids
Microbiological safety of dressings, 1144
Sanitizing *Yersinia*-contaminated eggs, 1053
Organoleptic evaluation
Preservation of fish cutlet, 56
Osmoadaptation
Thermal tolerance of *S. aureus,* 1277
Outbreak
Campylobacter outbreak traced to chicken, 309
Hepatitis A vaccination of food service workers, 768
Outcome
Clinical pathology of foodborne diseases, 822
Oxidation–reduction potential
Roles of ORP in EO water for microbial inactivation, 19
Oxidative stability
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404

Oxygen reduction
Comparison of reducing agents for *L. monocytogenes,* 1058
Oxygen scavengers
Centralized packaging of retail-ready meat, 796
Oyster
Oyster preservation by high pressure, 196
Ozone
Ozone as a terminal disinfectant, 1100

Packaging
Inactivation of *Bacillus* spores by UV laser irradiation, 753
Vacuum-packaged whey cheese, 216
Parasites
Isolation of parasites from fruits and vegetables, 775
Parsley
S. sonnei on parsley, 568
Pasteurization
Detection of alkaline phosphatase activity in ewe's milk, 1258
Hot dog pasteurization, 457
Pasteurized milk
Lactic acid bacteria inhibit *Listeria,* 916
Recovery-enrichment system for *L. monocytogenes,* 462
Pathogen characteristics
Microbiological data, 832
Pathogenesis
Clinical pathology of foodborne diseases, 822
Pathogenic *Escherichia coli*
UV inactivation and repair of pathogenic *E. coli* strains, 1015
Pathogenicity
L. monocytogenes from channel catfish, 613
Pathogen Modeling Program
Growth of *Bacillus cereus* in rice, 268
Pathogen survival
V. cholerae in ceviche, 445
Patulin
Patulin adsorption with carbon-composite adsorbents, 106
PCR
BAX for screening/genus *Listeria,* 343
PCR detection of *C. jejuni,* 299
S. aureus enterotoxins detected by PCR, 479
PCR-RFLP
PCR-RFLP identification of fish species, 1248
Pediococcus acidilactici
Stimulation of starter culture, 1492
Penetration
E. coli O157:H7 association and penetration into beef tissue, 3
Penicillium
Immunochemical detection of molds, 281
Penicillium expansum
E. coli O157:H7 in the presence of plant pathogens on apples, 1637
Penicillium polonicum
Influence of ecological factors on verrucosidin production, 231
Pepsin
Pepsin-digested lactoferrin in carrot juice, 376
Percent internal infection
Occurrence of fumonisins and moniliformin, 1732
Percoll
PCR detection of *C. jejuni,* 299
Perilla seeds
Hydrocarbons and 2-alkylcyclobutanones in irradiated perilla seeds, 1563
Persistent strain
Enhanced adherence of persistent *L. monocytogenes* strains, 1204
Pesticides
Chlordane and toxaphene residues, 763
Petrifilm
Compactdry TC evaluation, 665
Conventional versus rapid methods for counting *E. coli,* 1179
Evaluation of the Petrifilm RCC plate method, 123
Petrifilm Series 2000, 1137
pH
Heat resistance of *A. acidocaldarius,* 1377
Models for growth of *Z. bailii,* 222
pH effect on free chlorine species in EO water, 1534
Thermal stability of moniliformin, 1598
Water activity and pH of fresh pasta, 965
Phage(s)
Inactivation of bacteriophages, 509
Survival of *V. vulnificus,* 1049
V. vulnificus and its phage survival, 1667
Phane worm
Mycology of phane, 137
Phenol
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
Phenolics
Antimicrobial activity of rosemary, 1359
Photon-counting television camera
Rapid detection of enterotoxigenic *E. coli,* 534
Photoreactivation
UV inactivation and repair of pathogenic *E. coli* strains, 1015
Pigs
Antibiotics and *Salmonella* Typhimurium in pigs, 709
Bacteria in pig intestines, 1253
Diminution of *Campylobacter* colonization, 1430
L. monocytogenes in pig slaughterhouses, 1438
Plant contamination
Enhanced adherence of persistent *L. monocytogenes* strains, 1204
Plate heat exchanger
Survival of *L. monocytogenes* in pasteurized egg products, 921
Polylactic acid
Lactic acid and nisin effects on *Listeria monocytogenes* on beef, 131

Polymerase chain reaction
Detection of *E. coli* O157:H7 using PCR, 1032
Membrane-based detection of *Listeria* in food, 337
TGGE in identifying *Listeria,* 659
Polymer films
Nisin-coated polymer films, 1189
Polymorphisms
Identification and differentiation of *L. monocytogenes,* 332
Polyprion americanus
PCR-RFLP identification of fish species, 1248
Population dynamics
Fluctuating microbial counts in raw milk, 1240
Pork
Yersinia in raw and precooked meat in Mexico, 542
Postharvest
Biocontrol of *B. cinerea* on strawberry fruits, 386
Postpasteurization contamination
Surface spreading of *Listeria* on smear cheese, 1353
Potatoes
Microbiology of potatoes, 668
Potato products
Microbiology of potatoes, 668
Poultry
Bacteria in a multiple-tank poultry scalder, 1184
Campylobacter outbreak traced to chicken, 309
Reduction of poultry bacteria with oleic acid, 1282
Salmonella in Brazilian poultry slaughterhouses, 1749
Poultry processing
Acidified sodium chlorite treatment of broiler carcasses, 1087
Poultry sample
Rapid detection of *Salmonella* in poultry samples, 1043
Poultry skin
Nisin-containing films, 1268
Poultry slaughterhouses
Salmonella in Brazilian poultry slaughterhouses, 1749
Pozol
Antimicrobial(s) of a pozol isolate, 1123
Prawns
Shelf life of prawns after high-pressure treatment, 1381
Predictive microbiology
Calculation of spores survival, 190
Fluctuating microbial counts in raw milk, 1240
Probabilistic modeling of *S. cerevisiae* inhibition, 91
Predictive modeling
Models for growth of *Z. bailii,* 222
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
Simultaneous effect of salt and smoke on cold-smoked salmon microflora, 502
Premature browning
End point temperature and visual assessments in cooked beef patties, 1389
Prerequisite programs
Use of microbial data for HACCP verification, 810
Pressure
Activity of myrosinase from broccoli, 400
Presumptive enterococci
Indicator bacteria in hard Italian-type cheeses, 1697
Presumptive staphylococci
Indicator bacteria in hard Italian-type cheeses, 1697
Prions
Animal materials in food and feed, 1602
Probabilistic modeling
Probabilistic modeling of *S. cerevisiae* inhibition, 91
Probiotic(s)
Aflatoxin binding to bifidobacteria, 1133
Enzymatic quantification of *Bifidobacterium,* 322
Heat-killed probiotics for candidiasis, 638
In vivo assays on chicks with a probiotic strain, 1333
Probiotics in removal of aflatoxin, 412
Viability of bifidobacteria, 327
Probit analysis
A distribution approach to death kinetics, 1197
Process
Thermal resistance of *Salmonella,* 779
Processing
Vacuum-packaged whey cheese, 216
Produce
Detection of viruses in foods, 1738
Enzyme inhibition assay for carbamates, 1758
Propionibacteria
Dairy propionibacteria subjected to digestion, 1214
Protein and polysaccharide films
Nisin-containing films, 1268
Proteinases
Biogenic amines in cheese, 1551
Pseudomonas fluorescens
Bacterial attachment to lettuce leaves, 1433
Radiation effects on selected bacteria, 162
Pseudoterranova sp.
Anisakids in muscle of Argentinean hake, 1141
Psychrobacter
Psychrobacter in freshwater fish, 315
Psychrotrophs
Microbiology of chilled chicken, 1228
Public health
Carcass palpation in lambs, 1287
Pulsed electric fields
E. coli inactivation by combined pulsed electric fields and nisin, 741
Pulsed-field gel electrophoresis
Aeromonas spp. in ready-to-eat foods, 1754
Characterization of *V. parahaemolyticus* in Taiwan, 900
Pulsifier
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126
Putrescine
Biogenic amines in fermented sausages, 1544

Quality
Furosine content in Spanish commercial cheeses, 974
Quality assurance
Fluctuating microbial counts in raw milk, 1240
Quality test
Meat, quality testing, 1447

Quantitative risk assessment
UV inactivation of *E. coli,* 1587
Quorum
Growth of *E. coli* O157:H7 at 45.5°C, 1173

Radiation *D* value
Reduction of *Salmonella* and *E. coli* O157:H7 by gamma radiation on sprouts, 871
Rapid methods
Petrifilm Series 2000, 1137
Raw boxed beef
Microbiological verification of HACCP system, 1681
Raw milk
Biogenic amines in cheese, 1551
Ready-to-eat food(s)
Aeromonas spp. in ready-to-eat foods, 1754
Detection of viruses in foods, 1738
Hot dog pasteurization, 457
Microbiological quality of ice, 78
Recalls
Recalls of foods and cosmetics due to microbial contamination, 1113
Recovery
Comparison of reducing agents for *L. monocytogenes,* 1058
Recovery-enrichment system
Recovery-enrichment system for *L. monocytogenes,* 462
Recovery studies
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Red paprika
Electron beam irradiation and red paprika, 633
Regulations
Microbiological safety of dressings, 1144
Removal
Removal of aflatoxin M_1 by lactic acid bacteria, 645
Reporting
Foodborne disease incidents in Sweden, 1315
Residual nitrite
Genotoxicity of cooked cured meat pigment, 945
Residue
Simultaneous determination of penicillin residues by HPLC, 1421
Residue testing
Microbial methods for detection of cleaning chemical residues, 210
Resistance
Salmonella Typhimurium DT104 in poultry, 155
Retail meat products
CNS tissue in meat products, 258
Retail-ready fresh meat
Centralized packaging of retail-ready meat, 796
Riboprinting
C. botulinum riboprinting, 1347
Listeria ribotype analysis, 179
Ribotypes
L. monocytogenes in goat's milk, 1208
Ribotyping
C. botulinum riboprinting, 1347
Rice
Antimicrobial activity of carvacrol on rice, 620
Growth of *Bacillus cereus* in rice, 268
Risk assessment
Epidemiology, microbiology, and risk assessment of waterborne pathogens, 827
Roasted chicken
Campylobacter in roasted chicken samples, 117
Rosmarinus officinalis
Antimicrobial activity of rosemary, 1359
RT-PCR
Detection of viruses in foods, 1738
Rumen
Dietary effects on *E. coli* O157:H7 shedding in calves, 1630

Saccharomyces cerevisiae
Probabilistic modeling of *S. cerevisiae* inhibition, 91
Safe food-handling labels
Evaluation of safe food-handling labels, 1321
Safety
Surface decontamination of orange fruit, 961
Salad
Chitosan in mayonnaise, 202
Salmon
Survival of *Listeria* on cold-smoked salmon. 715
Salmonella
CPC treatments of beef, 593
Foodborne disease incidents in Sweden, 1315
Improved *Salmonella* medium, 1443
Improvement of MLCB agar, 1643
Inactivation of *Salmonella* by ultrasonic waves, 451
Mucosal starter culture *Salmonella* reduction, 867
Nisin-coated polymer films, 1189
Nisin-containing films, 1268
Rapid detection of *Salmonella* in poultry samples, 1043
Recalls of foods and cosmetics due to microbial contamination, 1113
Salmonella and flies, 958
Salmonella in fish and seafood, 579
Salmonella on alfalfa seeds, 1475
Salmonella serotypes in beef cows, 1648
SCFA modulation of *Salmonella hilA* and *invF* genes, 573
Specificity of conductance *Escherichia coli* assay, 264
Thermal resistance of *Salmonella,* 779
Salmonella Chester
Salmonella Chester on apple fruits, 876
Salmonellae
Bacteria in a multiple-tank poultry scalder, 1184
Chitosan in mayonnaise, 202
In vivo assays on chicks with a probiotic strain, 1333
Microbiology of chilled chicken, 1228
Salmonella Enteritidis
Salmonella Enteritidis in hard-cooked eggs, 36
Salmonella in molted laying hens, 545
Salmonella serotypes
Salmonella in Brazilian poultry slaughterhouses, 1749

Salmonella serotype Typhi
Improved *Salmonella* medium, 1443
Salmonella spp.
Prevalence of *Salmonella* spp. in Korea, 655
Salmonella Typhimurium
Antibiotics and *Salmonella* Typhimurium in pigs, 709
Antimicrobial effect of herb extracts on beef, 601
Bacterial attachment to lettuce leaves, 1433
Radiation effects on selected bacteria, 162
Salmonella Typhimurium DT104
Effect of chlorate on *E. coli* O157:H7 and *Salmonella* Typhimurium, 1038
Fate of *Listeria, E. coli* O157:H7, and *Salmonella* in Labneh, 608
Pathogen interventions on beef, 1326
Salmonella Typhimurium DT104 in poultry, 155
Salsa
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Salt
Models for growth of *Z. bailii,* 222
Sanitizer(s)
E. coli removal from whole apples, 703
Salmonella on alfalfa seeds, 1475
Surface decontamination of orange fruit, 961
Survival and growth of *Alicyclobacillus,* 1117
Sanitizing
Sanitizing *Yersinia*-contaminated eggs, 1053
Sausage
Yersinia in raw and precooked meat in Mexico, 542
Scalding
Bacteria in a multiple-tank poultry scalder, 1184
Scanning electron microscopy
Biofilms on alfalfa sprouts, 625
Scombroid poisoning
Thermal death of histamine-producing bacteria in seafood, 277
Seafood
Salmonella in fish and seafood, 579
V. cholerae in ceviche, 445
Sea pollution
Heavy metals in mussels, 273
Seasonal incidence
L. monocytogenes in goat's milk, 1208
Selective agars
Improved *Salmonella* medium, 1443
Selective medium
Improvement of MLCB agar, 1643
Sensory analysis
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
Serotypes
Incidence and characterization of *L. monocytogenes,* 186
Settled commercial outlets
Campylobacter in roasted chicken samples, 117
Shedding
Antibiotics and *Salmonella* Typhimurium in pigs, 709
Sheep
Sheep carcass dressing, 1291
Sheep's milk
Detection of alkaline phosphatase activity in ewe's milk, 1258
Shelf life
Chocolate milk spoilage patterns, 516
Glucose and tagatose effects on bacterial growth, 71
Nisin-coated polymer films, 1189
Shelf life of prawns after high-pressure treatment, 1381
Shell eggs
Prevalence of *Salmonella* spp. in Korea, 655
Shiga toxin enzyme-linked immunosorbent assay
Detection of STEC in beef, 1167
Shiga toxin-producing
Shiga toxin-producing *E. coli* on Prince Edward Island, 1583
Shiga toxiń-producing *Escherichia coli*
Detection of STEC in beef, 1167
The inadequacies of O157:H7 meat testing, 819
Shiga toxins
The inadequacies of O157:H7 meat testing, 819
Shigellosis
S. sonnei on parsley, 568
Short-chain fatty acids
SCFA modulation of *Salmonella hilA* and *invF* genes, 573
Shredded mozzarella cheese
Yeasts and molds in mozzarella cheese, 529
Shrimp
Chitosan in mayonnaise, 202
Shrimp allergy
Possibility of inhibition of shrimp allergy by ionizing radiation, 940
SimPlate
Conventional versus rapid methods for counting *E. coli,* 1179
Simulated digestive tract
C. jejuni reduction in a simulated chicken digestive tract, 1594
Simulated gastric fluid
V. vulnificus and its phage survival, 1667
Single-strand conformation polymorphisms
Identification and differentiation of *L. monocytogenes,* 332
16S rRNA
Multiplex PCR for *B. cereus,* 1496
PCR detection of *C. jejuni,* 299
TGGE in identifying *Listeria,* 659
Slaughterhouse
L. monocytogenes in pig slaughterhouses, 1438
yadA-positive *Y. enterocolitica* in a pig slaughterhouse, 31
Smear cheese
Surface spreading of *Listeria* on smear cheese, 1353
Smoke
Simultaneous effect of salt and smoke on cold-smoked salmon microflora, 502
Smoked fish
BAX for screening/genus *Listeria,* 343

Smoked salmon
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
Simultaneous effect of salt and smoke on cold-smoked salmon microflora, 502
Soap
Real-soil hand disinfection model, 495
Sodium chloride
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
Simultaneous effect of salt and smoke on cold-smoked salmon microflora, 502
Sodium hexametaphosphate
Combined antimicrobial effect of hop resins, 735
Soft drink
Chemical data evaluation for soft drinks, 1719
Solid-phase extraction
Simultaneous determination of penicillin residues by HPLC, 1421
Sorbate
E. coli O157:H7 in apple cider, 1026
Soya sauce
Antimicrobial activity of carvacrol on rice, 620
Spanish potato omelette
Microbial evaluation of foods in university restaurants, 1273
Species identification
Animal species identification, 408
PCR-RFLP identification of fish species, 1248
Specificity
Specificity of conductance *Escherichia coli* assay, 264
Speck
The mycobiota of Speck, 1399
Spinal cord
Spinal cord in AMRS product, 1107
Spoilage
Chocolate milk spoilage patterns, 516
Spoilage yeasts
Differential medium for *Z. bailii*, 1570
Spores
Inactivation of *Bacillus* spores by UV laser irradiation, 753
Modeling germination kinetics of *C. botulinum* spores, 1071
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Sporulation temperature
Heat resistance of *A. acidocaldarius*, 1377
Sprouts
Biofilms on alfalfa sprouts, 625
Reduction of *Salmonella* and *E. coli* O157:H7 by gamma radiation on sprouts, 871
Squid
Processing of low-salted and fermented squid using gamma radiation, 934
Standard operating procedures
Use of microbial data for HACCP verification, 810
Staphylococci
Control of biogenic amine production in fermented sausages, 1556
Staphylococcus
Thermal tolerance of *S. aureus*, 1277
Staphylococcus aureus
S. aureus enterotoxins detected by PCR, 479
Lethal effects of high hydrostatic pressure on foodborne pathogens, 1713
Staphylococcal enterotoxin biosynthesis at low water activity, 473
Stimulation of starter culture, 1492
Staphylococcus aureus carriage
S. aureus carriage, PFGE types, and enterotoxicity, 1487
Starter culture(s)
Biogenic amine reduction in fermented sausages, 237
Biogenic amines in cheese, 1551
Control of biogenic amine production in fermented sausages, 1556
Starvation
Starvation in *E. coli* O157:H7
Sterilization
Calculation of spores survival, 190
Inactivation of *Bacillus* spores by UV laser irradiation, 753
Stomacher
Pulsifier, membrane filtration, coliforms, and *E. coli* counts, 126
Storage
Biogenic amines in table olives, 111
Oyster preservation by high pressure, 196
Strawberry fruits
Biocontrol of *B. cinerea* on strawberry fruits, 386
Street stands
Campylobacter in roasted chicken samples, 117
Streptococcus thermophilus
Inactivation of bacteriophages, 509
Stress
Thermal tolerance of *S. aureus*, 1277
Subtypes
Multiple *Campylobacter* subtypes from meat, 1654
Sucrose esters
Spore inhibition by pressure, heat, and chemical preservatives, 1503
Sugar
Models for growth of *Z. bailii*, 222
Sunflower
Biofilms on alfalfa sprouts, 625
Surfaces of solids
Model for UV surface disinfection, 63
Surveillance
Foodborne disease incidents in Sweden, 1315
Foodborne diseases active surveillance network, 807
Survival
E. coli O157:H7 in buttermilk, 441
Survival curves
Calculation of spores survival, 190
Swabbing
Carcass sampling, 167

Swine
Susceptibility of *Y. enterocolitica* swine isolates, 395

Table olives
Biogenic amines in table olives, 111
D-Tagatose
Glucose and tagatose effects on bacterial growth, 71
tdh
Detection of *V. parahaemolyticus tdh* gene, 1660
Tea cider
Kombucha, the fermented tea, 976
Tea fungus
Kombucha, the fermented tea, 976
Temperature
Activity of myrosinase from broccoli, 400
E. coli inactivated by combined processing treatments, 884
Growth of *E. coli* O157:H7 at 45.5°C, 1173
Thermal stability of moniliformin, 1598
Temperature gradient gel electophoresis
TGGE in identifying *Listeria,* 659
Test tube
Comparison of mold spore analysis procedures, 1404
Tet-Lux test
Detection of tetracycline residues in milk, 953
Tetracycline
Detection of tetracycline residues in milk, 953
Thermal
Thermal resistance of *Salmonella,* 779
Thermal death
Thermal death of histamine-producing bacteria in seafood, 277
Thermal inactivation kinetics
Comparison of mold spore analysis procedures, 1404
Thermal processing
Calculation of spores survival, 190
Thermal tolerance
Thermal tolerance of *S. aureus,* 1277
Thermostable direct hemolysin
Characterization of V. parahaemolyticus in Taiwan, 900
Thiobarbituric acid-reactive substances (TBARs)
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
α-Tocopherol
Antioxidative/antimicrobial effects of galangal and α-tocopherol, 404
Tomatoes
Bactericidal activity of isothiocyanate, 25
Toxaphene
Chlordane and toxaphene residues, 763
Toxins
Clinical pathology of foodborne diseases, 822
Transmissible spongiform encephalopathy (TSE)
Animal materials in food and feed, 1602
Transmission
Helicobacter pylori in cattle and beef products, 174
Turkey
Botulinal toxigenesis in modified atmosphere packaged cooked turkey, 1511

TVBN
Simultaneous effect of salt and smoke on cold-smoked salmon, 1222
12S rRNA
PCR-RFLP identification of fish species, 1248
Tyramine
Biogenic amines in fermented sausages, 1544

Ultraviolet absorption
pH effect on free chlorine species in EO water, 1534
Ultraviolet light
UV reduction of *E. coli* O157:H7 in cider, 563
UV
UV inactivation of *E. coli,* 1587
UV disinfection
Model for UV surface disinfection, 63
UV inactivation
UV inactivation and repair of pathogenic *E. coli* strains, 1015
UV irradiation
Inactivation of *Bacillus* spores by UV laser irradiation, 753

Vaccination
Hepatitis A vaccination of food service workers, 768
Vacuum packed
Shelf life of prawns after high-pressure treatment, 1381
Validation
Microbial data for verification—industry perspectives, 815
Validation of acid washes as critical control points, 1676
Vancomycin
Vancomycin-resistant enterococci in raw meat, 912
Variability
UV inactivation of *E. coli,* 1587
Variety meats
Beef variety meat decontamination, 44
Vegetables
Isolation of *Cyclospora* oocysts from fruits and vegetables, *1410*
Isolation of nontuberculous mycobacteria from foods, 930
Verification
Microbial data for verification—industry perspectives, 815
Use of microbial data for HACCP verification, 810
Vero cell assay
Detection of STEC in beef, 1167
Shiga toxin-producing *E. coli* on Prince Edward Island, 1583
Verrucosidin
Influence of ecological factors on verrucosidin production, 231
Viability
Viability of bifidobacteria, 327
Viability staining
Penetration of *E. coli* into lettuce tissues, 434
Vibrio cholerae
V. cholerae in ceviche, 445

Vibrio parahaemolyticus
Characterization of *V. parahaemolyticus* in Taiwan, 900
Detection of *V. parahaemolyticus tdh* gene, 1660
Vibrio vulnificus
Survival of *V. vulnificus,* 1049
V. vulnificus and its phage survival, 1667
Vinegar
S. sonnei on parsley, 568
Violet red bile agar
Evaluation of the Petrifilm RCC plate method, 123
Virulence factors
L. monocytogenes from channel catfish, 613
Vitalistic
A distribution approach to death kinetics, 1197

Water activity
Staphylococcal enterotoxin biosynthesis at low water activity, 473
Thermal tolerance of *S. aureus,* 1277
Water activity and pH of fresh pasta, 965
Water disinfection
UV disinfection of water, 1529
UV inactivation and repair of pathogenic *E. coli* strains, 1015
Weibull distribution
Calculation of spores survival, 190

Yeast(s)
Antimicrobial(s) of a pozol isolate, 1123
Chitosan in mayonnaise, 202
Chromogenic medium for food yeasts, 651
Mycology of phane, 137
Transport of acetic acid in *D. anomala,* 96
Yeast and mold enumeration methods
Yeasts and molds in mozzarella cheese, 529
Yeast spoilage
Models for growth of *Z. bailii,* 222
Yersinia
Sanitizing *Yersinia*-contaminated eggs, 1053
Yersinia in raw and precooked meat in Mexico, 542
Yersinia enterocolitica
Methods comparison for isolation of *Y. enterocolitica,* 1483
Susceptibility of *Y. enterocolitica* swine isolates, 395
yadA-positive *Y. enterocolitica* in a pig slaughterhouse, 31
Y. enterocolitica in chicken carcasses, 1591
Yogurt (yoghurt)
Viability of bifidobacteria, 327

Zonal shielding model
Model for UV surface disinfection, 63
z-Value
Thermal resistance of *Salmonella,* 779
Zygosaccharomyces bailii
Differential medium for *Z. bailii,* 1570
Models for growth of *Z. bailii,* 222
